

Tonic Work Bench

Tonic Workbench is an adaptive benching system that flows with the pace and needs of modern work environments through functional, modular accessories.

Details

The Tonic Workbench emphasizes choice and flexibility, allowing it to suit a range of needs and applications. Select between seated or standing-height, single or dual-sided, and customize it with a range of infill components and accessories.

Features

- Available in seated or standing height
- Dual-sided and Single-sided configurations
- Easy access to power and data
- Modular, reconfigurable infill components
- Either 2 duplexes or 4 duplexes per user
- Simple specification and installation

A

- Select from modular infill components like the Neighborhood Light and fabric screens to customize the center deck of the Workbench
- Single-sided configurations support flat, pallet, fabric screen, and acrylic screen infill components

B

- Various end segments available to complete the Workbench run
- Select storage ends for dual-sided configurations for more ways to help keep spaces clutter-free

C

- Power and data cables route through the Workbench's power raceway
- Specify either 2 or 4 duplexes per user for both single and dual-sided configurations

D

- Dual and single-sided Workbench segments available in 45", 60", 75", and 90" widths
- Dual and single-sided Workbenches can be specified at either seated or standing height

Dual-sided Workbench Starter

D: 53, 65
