Allé Mobile Pin + Write Boards

Mobile Boards can be specified in a single material or a combination of tackable fabric or magnetic markerboard faces.

Mobile Pin boards are available in any standard Watson Fabric.

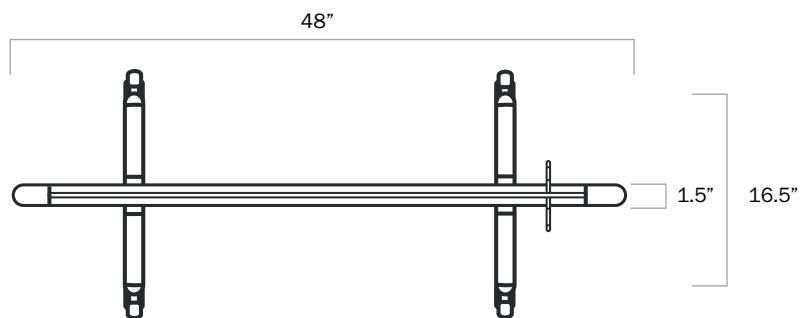

The mobile boards are lightweight and easy to move. Four locking casters (65mm) are available in white or black.

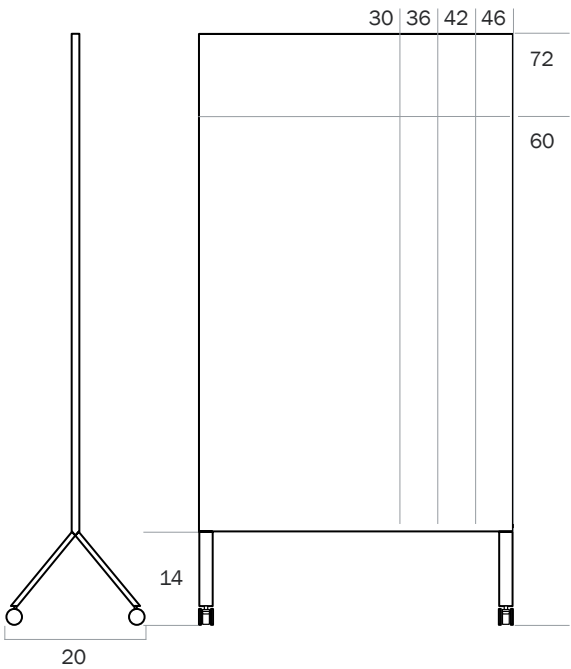

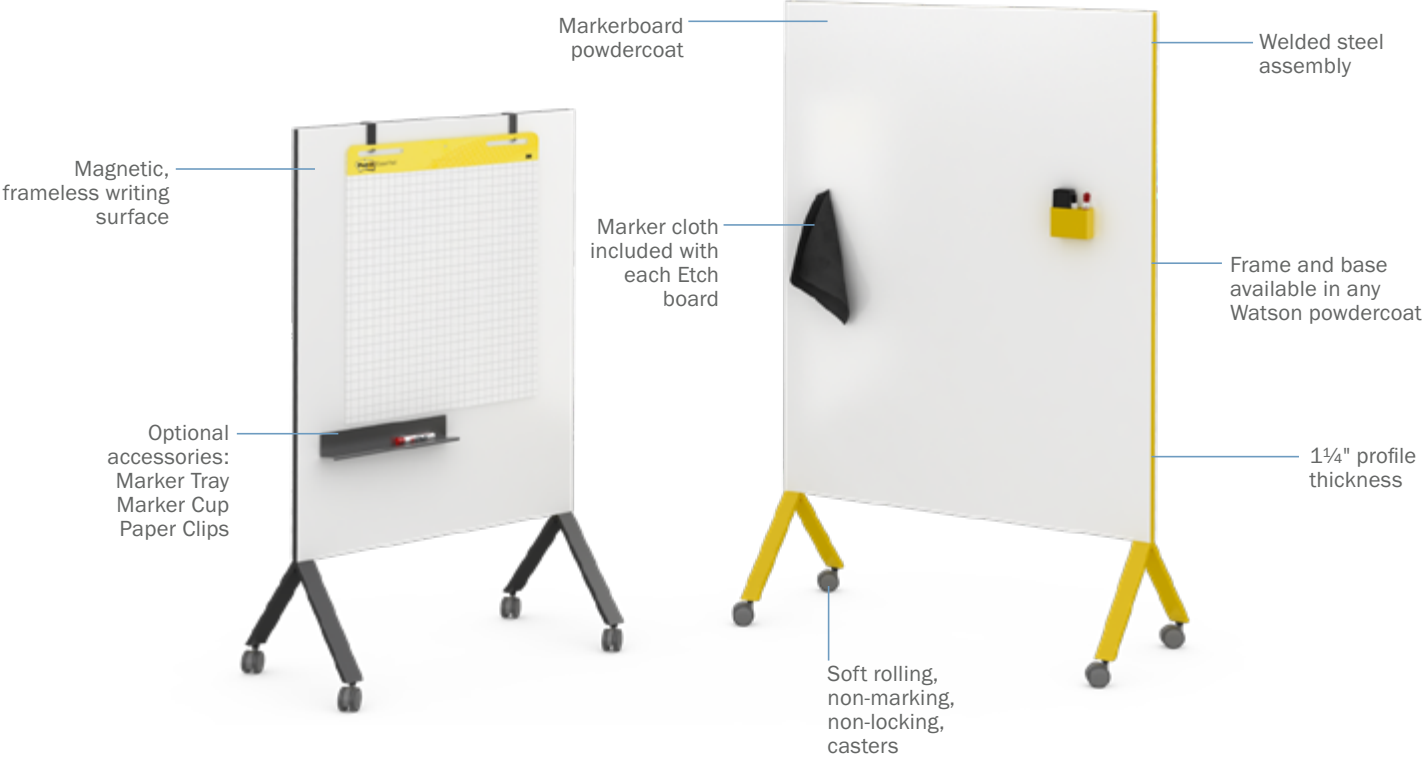

A PET coathook is included with each mobile board and comes in Light Gray when white casters are selected or Charcoal when black casters are selected.

- Mobile boards can be offset and nested to save space.

Accessories | Product Specification Details

Allé Pin and Write Boards

The frame of the Pin and Write boards are comprised of 6063-T6 aluminum extrusions mechanically fastened to cast aluminum corner connectors. The core board is comprised of a stack of recycled corrugated cardpaper layers providing excellent tackability and lightweight transport. Depending on product optioning, this core board will be covered by fabric or a magnetic markerboard sheet metal adhered with non-VOC emitting rubber emulsion Simalfa glue.

The pair of mobile legs mechanically fasten to the lower horizontal frame extrusion. The legs are composed of 40mm steel tube, and 65mm diameter swivel casters with locking capabilities that thread into cast aluminum end caps.

Each board comes standard with a black or gray PET felt coat hook that press-fits into a slot in the upper horizontal frame extrusion.

Etch

Etch Markerboards are constructed using three primary components; an internal steel frame, steel surface veneers and two pairs of legs. Internal frame supports are cut from 1"x2" 16 gauge steel tube, each miter cut, welded and dressed at adjoining corners to create a rigid substructure.

The markerboard surfaces are laser cut from 22 gauge cold-rolled steel and finished with a powdercoat formulated specifically for dry erase applications. Each leg is cut from 16 gauge steel tube and then welded to two ¼" steel joining plates. Leg pairs are discretely fastened to the frame using an internal 5/16-18" bolt. 2⅜" casters are attached to each leg using threaded stems and are rated for loads up to 100 lbs each. All metal accessories are constructed using 18 gauge cold rolled steel.

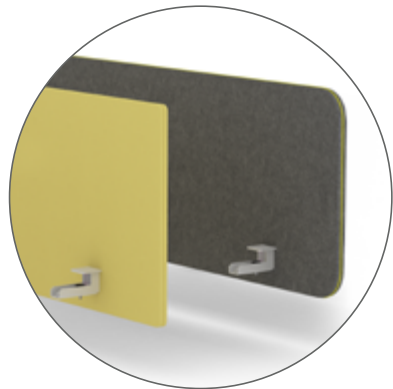

Markerboards

White, dry erase marker panels are standard marker board laminates cold fused to ½" industrial grade particle board. Panels are edged with 1.5mm, thermofused, extruded PP polymeric aluminum-finished edgeband.

Tak, Pin, & Jot Screens

The Jot Board has a particleboard core and is finished with markerboard laminate. The Tak & Pin Screens have a fiberboard core and are covered with 100% recycled and recyclable fabrics.

Seiri Screens (Desk Mount)

Seiri Screens are desk mounted and feature an integrated steel accessory rail. Screen covering is 100% recycled polyester woven fabric. The tackable core material is comprised of particleboard and honeycomb composite. The accessory rail is constructed from powdercoated, 14 gauge formed steel. Screens can be specified with 1-sided or 2-sided rails. The bracket component is ¼" thick, powdercoated steel. Screens ship with four powdercoated 14 gauge, steel accessory bins.

Seiri Screens (Wall Mount)

Wall mount screens are constructed from ¾" recycled paper board, covered with 100% recycled polyester woven fabric, and backed with ¼" hardboard. Two-part metal rail cleats are included for wall attachment.

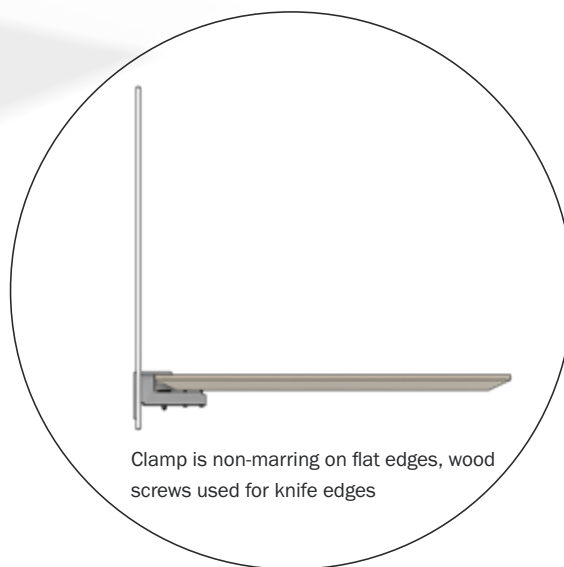

Steel Modesty Shield

The Steel Modesty Shield is formed from 22 gauge (.03"), powdercoated sheet steel and includes acoustic dampening fabric on the backside.

Accessories | Product Specification Details

Pin Acrylic Desk Screen

The Pin Acrylic Screen is a 9 mm thick acrylic panel that comes in either a frosted or clear finish. The screen mounts to the back and sides of a 1 1/8" thick worksurface using powder-coated steel clamp brackets that can be easily repositioned for routing cables or cleaning. The corner radii and bracket style match those of the Pin Desk Screen.

Tak Acrylic Desk Screen

The Tak Acrylic Screen is a 9 mm thick acrylic panel that comes in either a frosted or clear finish. The screen mounts to the back and sides of a 1 1/8" thick worksurface using powder-coated steel clamp brackets that can be easily repositioned for routing cables or cleaning. The corner radii and bracket style match those of the Tak Desk Screen.

Surface Mounted Acrylic Desk Screen

The Surface Mounted Acrylic Desk Screen is a 9 mm thick acrylic panel that comes in either a frosted or clear finish. The screen mounts just above the back or sides of worksurfaces ranging from 3/4" thick to 1 1/8" thick using powder-coated steel clamp brackets that can be easily repositioned for routing cables or cleaning. The screen sits flush with the edges of the worksurface to fit into existing desking layouts.

Mid-span Surface Mounted Acrylic Screen

The Mid-span Surface Mounted Acrylic Screen is a 9 mm thick acrylic panel that comes in either a frosted or clear finish. The screen can be placed anywhere along the width or depth of a surface by clamping onto the ends of worksurfaces ranging from 3/4" thick to 1 1/8" thick. The steel clamp brackets are powder coated and can be easily repositioned for routing cables, cleaning, or adjusting the work area.

Mobile Acrylic Screen

The Mobile Acrylic Screen is a 9 mm thick acrylic panel that comes in either a frosted or clear finish. The screen is a free-standing mobile divider that rests on the floor and can be positioned between workstations to create barriers between occupants. The landscape version has a low-profile footprint on one end to fit between tight spaces. The portrait version can be used in spaces where a higher barrier is necessary. The leg brackets come in standard powder-coat finishes.

Allé Mobile Planter

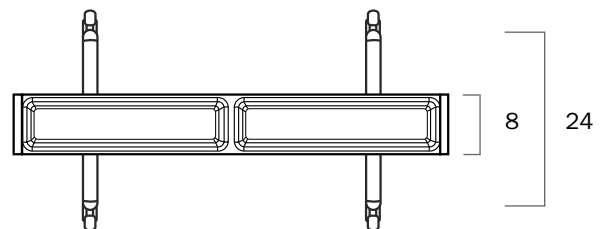

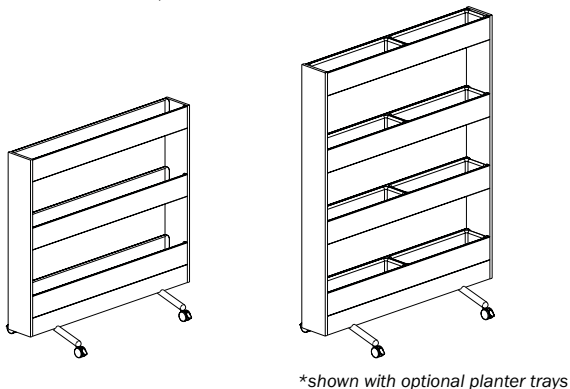

Mobile Planter

D: 24" (including base)

W: 55"

H: 3 Tier: 52" H, 4 Tier: 72" H

Allé Mobile Monitor Wall Details

The Mobile Monitor wall is available in two widths which determine the largest possible tv monitor size they can accommodate.

56"W x 72"H x 24"D for up to 55" Monitor
68"W x 72"H x 24"D for up to 65" Monitor

Integrated A/V mount supports a wide range of VESA mounting patterns (max 600 x 400mm) and flexibility in monitor mounting locations.

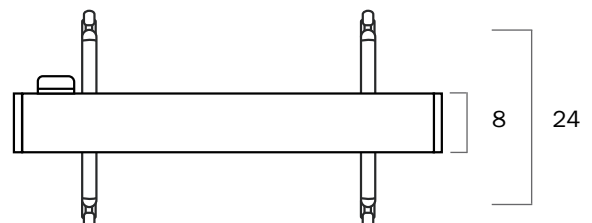

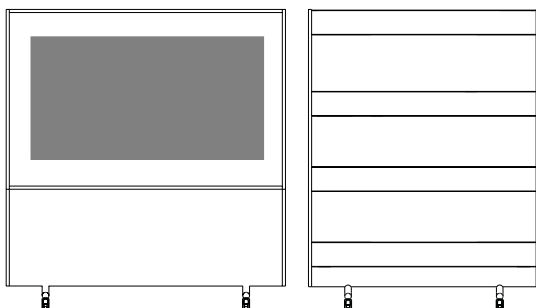

Optional convenience power can be specified to provide HDMI, USB A+C and 2 simplexes mounted below the monitor.

Excess cord can be looped around the integrated cord manager to keep it up off the floor.

The mid panel is inset from the edge of the case by 3". To ensure the tv does not extend beyond the case, select a shallow depth tv monitor.

The back side of the mobile monitor wall features a tackable fabric panel. Behind this panel is a utility power strip with 4 simplexes.

- When placed side by side, the Mobile Monitor Wall and the 4 tier, 72"H Mobile Planter align creating functional space division.

Mobile Planter

The lower horizontal panels and side vertical panels on the Mobile Planter are built from wood composite board that is 100% recycled industrial by-product from local milling operations located within our Pacific Northwest region. The wood board contains 90-95% recycled content that in turn may be recycled again. Boards are finished with GreenGuard™ certified laminates. Laminates are fused to surfaces using water-based, non-toxic and ultra-low VOC emitting adhesive.

The pair of mobile legs mechanically fasten to hardware embedded in the lower case assembly and are tied together with an aluminum extrusion housed inside of the assembly for additional support. The legs are composed of 40mm steel tube, and 65mm diameter swivel casters with locking capabilities that thread into cast aluminum end caps.

Optional black high impact polystyrene (HIPS) plastic planter trays provide a sturdy and waterproof container for planter pots up to 5.25" in diameter or allow for direct planting inside of the tray.

The planter trays nest inside troughs that are composed of bent 16 gauge cold rolled steel. These troughs are mechanically fastened to the side vertical panels.

Monitor Wall

The Monitor Wall is built from wood composite board that is 100% recycled industrial by-product from local milling operations located within our Pacific Northwest region. The wood board contains 90-95% recycled content that in turn may be recycled again. Boards are finished with GreenGuard™ certified laminates. Laminates are fused to surfaces using water-based, non-toxic and ultra-low VOC emitting adhesive.

The pair of mobile legs mechanically fasten to hardware embedded in the lower case assembly and are tied together with an aluminum extrusion housed inside of the assembly for additional support. The legs are composed of 40mm steel tube, and 65mm diameter swivel casters with locking capabilities that thread into cast aluminum elements.

Each Monitor Wall comes standard with a Tripp Lite four outlet power distribution unit (PDU) located behind the removable fabric panel on the backside of the upper case assembly. An additional convenience power unit is also optionable. The in-surface power solution unit mounted into the front panel of the unit (situated directly beneath the monitor) that features two power outlets, HDMI, and a combo USB-A + USB-C ports. The system integrates to a three outlet Triplex unit (instead of the standard Tripp Lite PDU) also behind the removable fabric panel on the backside of the upper case assembly.

A tackable, removable fabric panel is located on the backside of the upper case assembly. The fabric panel is constructed from two pieces of 12mm LDF wrapped in fabric using a non-VOC emitting rubber emulsion Simalfa glue.

A bent 12 gauge cold rolled steel cable manager bracket mechanically fastens to the backside of the lower case assembly. The powder finish of this bracket matches the finish selected for the mobile legs.

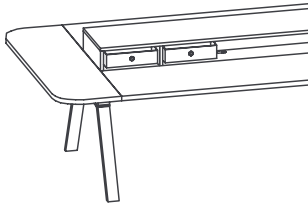

An AV mounting solution is mechanically fastened to the center panel of the Monitor Wall. It is constructed of bent 12 gauge cold rolled steel brackets. The mount accommodates a max VESA mounting pattern of 600x400mm.

Tonic Accessory Metal Bins

Haven | Product Specification Details

Recharge Bench

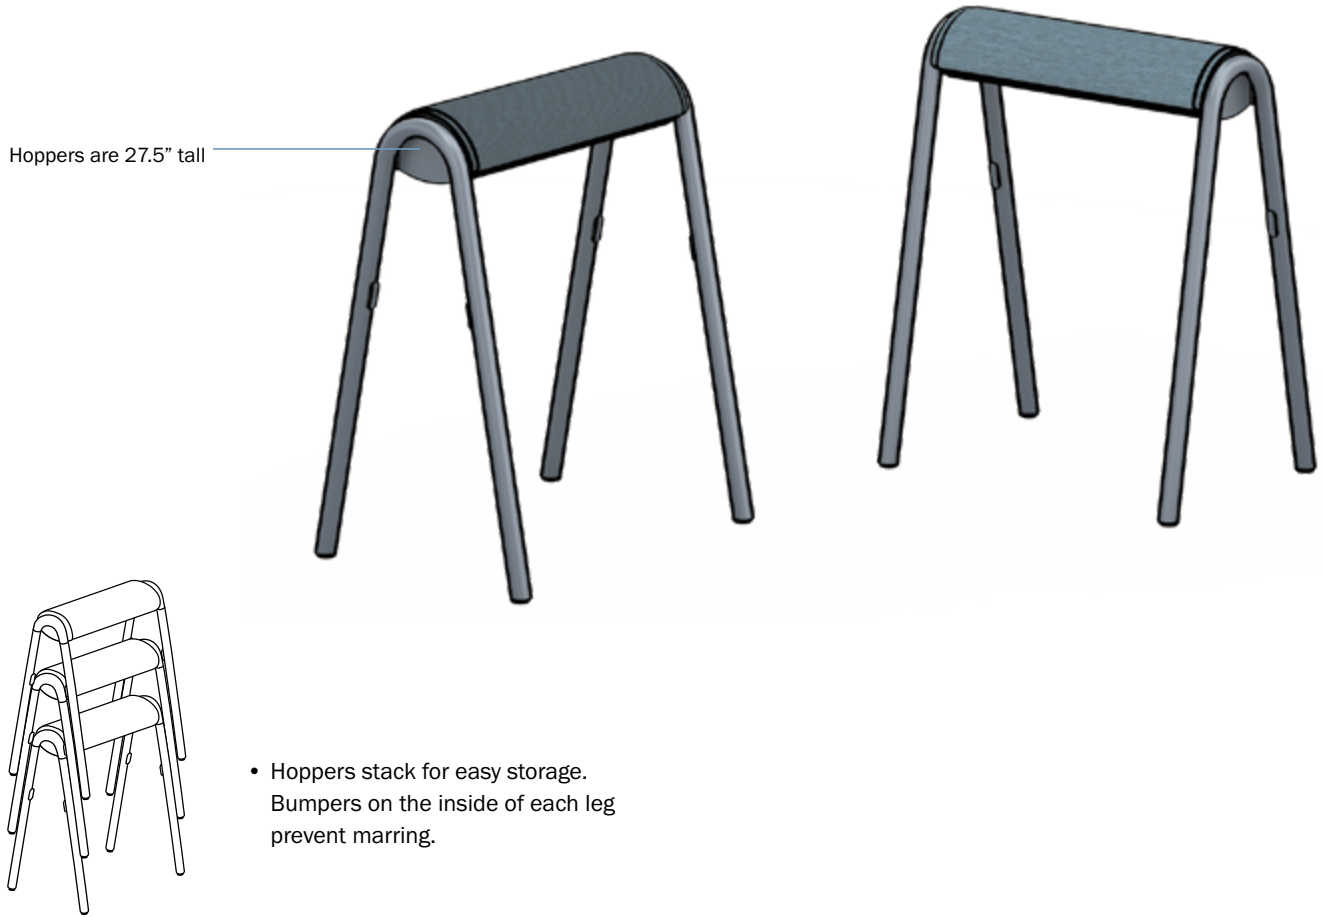

The Haven Recharge Bench is an assembly of two bridge legs, a support beam, and two seat cushions. The bridge legs are powder coated weldments with two 10 gauge, cold rolled steel brackets, two “D” shaped, proprietary welded roll-formed steel tubes, and two cast A380 aluminum feet that mate seamlessly to the tubes using a proprietary clamping design. The feet are finished with an M10, 1” diameter, knurled nylon glide. The support beam is a powder coated, 2” x 2”, 0.12” wall, hot rolled steel tube with several clearance holes on each end to allow for attachment to the bridge legs. The seat cushions are made from a 3/4” NAF MDF board and 1-1/4” thick, grade 2670, open-cell foam. Fabric is stretched around the foam and MDF board and stapled to the bottom of the board. An 18 gauge cold rolled steel plate is screwed to the bottom of the assembly and finishes the cushion. Depending on which product is ordered, there is either no accessory, a neighborhood light, a round surface, a swiveling oblong surface, or a planter tray. The Neighborhood Light is comprised of three primary components: the stem, the light fixture, and the shade. The stem is constructed of powder coated extruded aluminum and is fitted with a precision machined powder coated aluminum button. Embedded within the stem are two USB charging receptacles – one USBC capable of charging up to 60W and one USB-A capable of charging up to 10W. The light fixture produces up to 2000 lumens at 3000K CCT with a CRI of 90+. The light is continuously dimmable from 0 to 100% by pressing and holding the button in the stem. The light also features a frosted polycarbonate diffuser to provide clean, even light. The light is equipped with an automatic shutoff timer that powers the light off after six hours of inactivity. The shade is made of powder coated 16 gauge stamped aluminum and is 16 inches in diameter. The light is 42” high and includes a 24V 120W power supply with a 6ft cable. The round surface and swiveling oblong surface are either made from 18mm European birch multi-ply plywood or 3/4” double refined NAF MDF, depending on optioning. Both cores are sealed with a waterborne edge stain. All core materials are finished on top with either horizontal or post-form grade high pressure laminate or Forbo furniture linoleum and on bottom with horizontal grade backer sheet for a balanced construction. Both surfaces are attached to the support beam of the bench via a powder coated weldment consisting of 10 gauge cold rolled steel plates and a 40mm welded roll-formed E235+C steel tube. The planter tray is a powder coated weldment with a 14” diameter, spun 14 gauge cold rolled steel tray, a 34mm welded roll-formed E235+C steel tube, and a 3/16” cold rolled steel plate.

Laptop Tables

The Haven Laptop Table is comprised of three main components: base, vertical support, and top. The base is made of a powder coated 1/4” cold rolled steel plate. The vertical support is a powder coated weldment of two 3/16” cold rolled steel plates and a “D” shaped, proprietary welded roll-formed steel tube. The top can either be a powder coated, 3/16” cold rolled steel plate or a layup of laminate, wood core material, and backer. The steel top plate has a 3/16” cold rolled steel bracket welded onto it. The wood top core material could be 18mm European birch multi-ply plywood or 3/4” double refined NAF MDF, depending on optioning. Both cores are sealed with a waterborne edge stain. All core materials are finished on top with either horizontal or post-form grade high pressure laminate or Forbo furniture linoleum and on bottom with horizontal grade backer sheet for a balanced construction. Two M8, flat-head screws are threaded through countersunk holes in the base to threaded holes in the bottom of the vertical support. To assemble the vertical support to the top, M6 machine screws or #10 wood screws are threaded into the top through the top plate on the vertical support. The base is finished with six adhesive backed sliders to facilitate movement on a variety of surfaces.

Allé Hopper

Hoppers are 27.5" tall

- Hoppers stack for easy storage. Bumpers on the inside of each leg prevent marring.

The Hopper, Sofa and Sofa Single are offered in a limited selection of upholstery fabrics:

Pin and Write Boards

The frame of the Pin and Write boards are comprised of 6063-T6 aluminum extrusions mechanically fastened to cast aluminum corner connectors. The core board is comprised of a stack of recycled corrugated cardpaper layers providing excellent tackability and lightweight transport. Depending on product optioning, this core board will be covered by fabric or a magnetic markerboard sheet metal adhered with non-VOC emitting rubber emulsion Simalfa glue.

The pair of mobile legs mechanically fasten to the lower horizontal frame extrusion. The legs are composed of 40mm steel tube, and 65mm diameter swivel casters with locking capabilities that thread into cast aluminum end caps.

Each board comes standard with a black or gray PET felt coat hook that press-fits into a slot in the upper horizontal frame extrusion.

Sofa

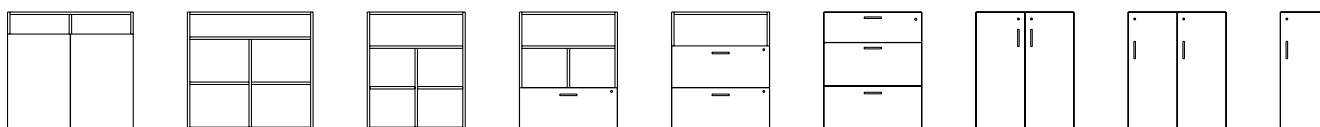

The frame consists of three bent 40mm steel tube pieces that are connected by POM plastic press-in fittings. A 40mm steel horizontal support tube is mechanically fastened to the bent tube frame. Two 100mm diameter locking black swivel casters are secured into POM plastic fittings on the front side of the Sofa.

Depending on optioning, the Sofa contains one or two sewn assemblies consisting of an outer polyester fabric, a 3D polyester non-slip support mesh fabric, and zippers for easy access to the cushions. The cushions are 100% polyester fill. In the case of a two cushion Sofa model, the cushions are secured together in the middle of the unit by two hook and loop fastening straps located on the underside of the sewn assembly. Recommended weight capacity of 240lbs per cushion.

Hopper

The frame is a welded assembly consisting of two 1.25" bent steel tube pieces, 0.188" steel end plates, and a bent sheet metal support bracket. The cushion features a high-density non-fire-retardant polyurethane foam cushion molded over a plywood core. This cushion assembly is then wrapped in polyester fabric. A plastic press-in fitting glide at the bottom opening of each leg features a soft PET felt cap for a non-skid surface. Rubber press-in bumpers located on the inside of each leg prevent marring while stacking. Recommended stacking limit of no more than 3 high. Recommended weight capacity of 240lbs.

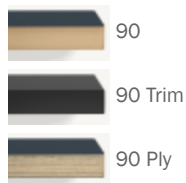

Bahn Work Island

Bahn Work Island | Product Specification Details

Work Island Storage

The cabinet shell, face, and internal partitions are constructed of 3/4" thick laminated industrial grade NAF particleboard finished with color matched 1.5mm polypropylene edge banding. All units are non-handed or back to back mirrored for a modular construction. The units ship individually and are united to base and top in the field using a modular connection pattern. The bases mount using confirmat screws and the tops mount via a metal to metal connection. All bases come equipped with 3" industrial grade casters to move easily with heavy loads.

Work Island Tops

Worksurfaces are made from either 1-1/8" M2 industrial NAF particleboard or 27mm double refined NAF MDF and finished with horizontal or post-form grade high pressure laminate and a horizontal grade backer sheet for balanced construction. The laminates are cold press bonded using Wilsonart 3100 PVA ultra-low VOC adhesive. The 90 profile highlights the perpendicular geometry of our most traditional silhouette. The 90 Natural edge is the greenest choice featuring an exposed MDF core, clear-coated with a waterborne finish. 90 Trim is a 1.5mm synthetic edge with a nominal reveal for the most compact edge profile.

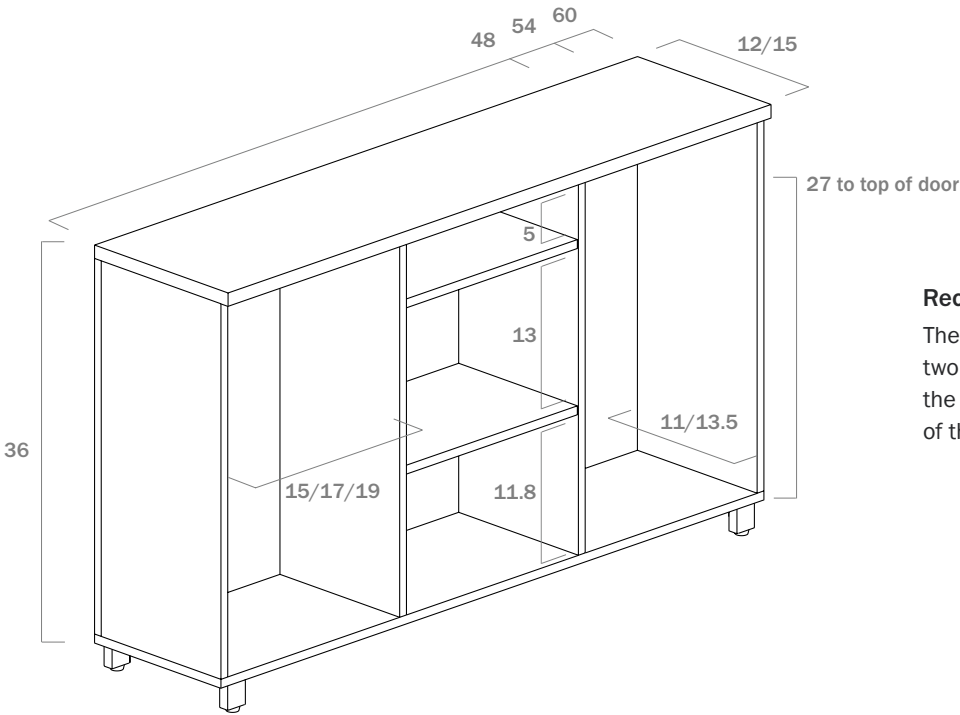

Locker Storage

The cabinet panels are joined with robust 8mm hardwood glued dowel connections. The electronic lock is GUUB Model P122EV/CM01 semi-flush mount, satin silver, 4-button with a turn knob. The long-life Lithium button cell (CR2032) averages a three-year life. No tools are necessary to replace the battery. In the event the battery dies and there are no batteries on hand, a USB charging cable can be used to power up the lock and open the door. The capacitive touch switch is easy to clean and requires minimal maintenance.

Bahn Recycle Center

The Recycle Center may be specified with an accessory back panel. Panel options include fabric, magnetic markerboard, or metal powdercoated planters to add greenery to any space. Accommodates standard 10 gallon bins (not included with unit). Ships with waste, recycling, and compost door labels. Planters sized for 7" pots.

Edge Options

Recycle Center Interior Measurements

The Recycle Center comes in three widths and two depths. Interior measurements shown to the left are dependent on the depth and width of the specified unit.

Bahn Lockers & Cubbies

Bahn Office includes a line of multi-functional freestanding lockers that provide communal storage for team environments. Use Bahn freestanding lockers to separate activity zones or at the end of a workstation run. Full-height lockers are designed for up to four users per cabinet, likewise Bahn Cubbies can accommodate up to eight users.

Bahn Tower

The large lockable roll-out shelf maximizes vertical space and is ideal for sit-to-stand work applications or when higher side privacy is desired. The Side Tower provides concealed storage for bags, coats, books, and gear.

Optional USB ports provide convenience for charging devices and help keep the worksurface clear of clutter.

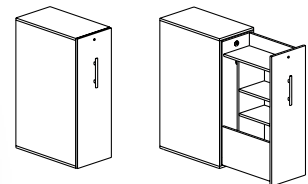

The Side Tower is freestanding, and handedness can be reversed in the field, responding to change and growth in the workplace.

Bahn Storage | Product Specification Details

Side Tower

The Bahn Side Tower top panel is made from 3/4" thick laminated industrial grade particleboard. The cabinet shell, face, and internal partitions are constructed of 3/4" thick laminated industrial grade NAF particleboard finished with color matched 1.5mm polypropylene edge banding. The interior of the cabinet is finished in Fashion Grey to complement your choice of case finish from Watson's standard case finish offering. The interior roll-out shelf handedness can be reversed in the field by removing and installing on the opposite side.

Mobile Storage

The Bahn Storage tops are made from either 1-1/8" M2 industrial NAF particleboard or 27mm double refined NAF MDF finished with high pressure laminate. The cabinet shell, face, and internal partitions are constructed of 3/4" thick laminated industrial grade NAF particleboard finished with color matched 1.5mm polypropylene edge banding. All Credenzas and Towers are non-handed, making them flexible pieces for the agile office.

Work Island Storage

The cabinet shell, face, and internal partitions are constructed of 3/4" thick laminated industrial grade NAF particleboard finished with color matched 1.5mm polypropylene edge banding. All units are non-handed or back to back mirrored for a modular construction. The units ship individually and are united to base and top in the field using a modular connection pattern. Storage Tops

Worksides are made from either 1-1/8" M2 industrial NAF particleboard or 27mm double refined NAF MDF and finished with horizontal or post-form grade high pressure laminate and a horizontal grade backer sheet for balanced construction. The laminates are cold press bonded using Wilsonart 3100 PVA ultra-low VOC adhesive. The 90 profile highlights the perpendicular geometry of our most traditional silhouette. The 90 Natural edge is the greenest choice featuring an exposed MDF core, clear-coated with a waterborne finish. 90 Trim is a 1.5mm synthetic edge with a nominal reveal for the most compact edge profile.

Locker Storage

The cabinet shell, face, and internal partitions are constructed of 3/4" with color matched 1.5mm polypropylene edge banding material. The cabinet panels are joined with robust 8mm hardwood glued dowel connection. Single case construction makes installation and leveling a breeze. The electronic lock is GUUB Model P122EV/CM01 semi-flush mount, satin silver, 4-button with a turn knob. The long-life Lithium button cell (CR2032) averages a three-year life. No tools are necessary to replace the battery. In the event the battery dies and there are no batteries on hand, a USB charging cable can be used to power up the lock and open the door. The capacitive touch switch is easy to clean and requires minimal maintenance.

Locks

Bahn Lockers have the option of keyed locks or digital locks with "Guest" or "Resident" settings. Keyed locks can be specified one of three ways; factory installed "L," non-locking "N," or field installed "U." "L" locks are keyed randomly and factory installed. The non-locking "N" option keeps drawer and door faces clear when locks are not required. Field installed "U" locks are keyed alike upon installation in the field.

Digital Lock Function

Zone Lockers | Product Specification Details

General Construction

Zo is built from wood composite board that is 100% recycled industrial by-product from local milling operations located within our Pacific Northwest region. The wood board contains 90-95% recycled content that in turn may be recycled again. Boards are finished with GreenGuard™ certified laminates. Laminates are fused to surfaces using water-based, non toxic and ultra-low VOC emitting adhesive. Zo's steel legs have recycled content of over 80%, and are 100% recyclable. Lockers ship with wood screws to gang together side-by-side.

For durability and improved aesthetics, storage side panels are banded all the way around. Side panels are set flush to the top and bottom of the case, and all fasteners are fully concealed.

Locks

Zone Lockers have the option of keyed locks or digital locks with "Guest" or "Resident" settings. Keyed locks can be specified one of three ways; factory installed "L," non-locking "N," or field installed "U." "L" locks are keyed randomly and factory installed. The non-locking "N" option keeps drawer and door faces clear when locks are not required. Field installed "U" locks are keyed alike upon installation in the field.

Tia Storage | Product Specification Details

Secondary Storage

The Tia Secondary storage cabinet shell, face and internal partitions are constructed of 3/4" thick laminated industrial grade NAF particleboard finished with color matched 1.5mm polypropylene edge banding. The storage plinth panel is made from 1-1/8" thick laminate industrial grade NAF particleboard finished with color matched 1.5mm polypropylene edge banding. The cabinet shell and internal partitions are charcoal. The storage cladding material is 1/2" thick laminated industrial grade NAF particleboard finished with color matched 1.5mm polypropylene edge banding. If the unit has open display shelves these are constructed using 1/2" thick material also, the outer corner of the shelves is supported using 1/2" square hot formed steel rod. The cabinet doors are either supplied with an anodized aluminum pull or touch release door hardware. The units are designed to integrate with other Tia storage units and come with 12-gauge powder coated cold rolled steel mounting bracket required for stability.

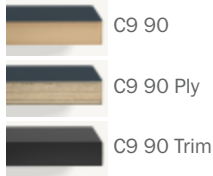

Freestanding Storage

The Tia freestanding storage cabinet shell, face and internal partitions are constructed of 3/4" thick laminated industrial grade NAF particleboard finished with color matched 1.5mm polypropylene edge banding. The storage top and plinth panels are made from 1-1/8" thick laminate industrial grade NAF particleboard finished with color matched 1.5mm polypropylene edge banding. The cabinet shell and internal partitions are charcoal. The storage cladding material is 1/2" thick laminated industrial grade NAF particleboard finished with color matched 1.5mm polypropylene edge banding. The flush drawer pulls are achieved using an anodized aluminum extrusion mounted to the back side of the drawer face. All drawers are constructed from 1/2" thick laminated industrial grade NAF particleboard finished with color matched 1.5mm polypropylene and supported by undermount drawer slides with integrated soft-close mechanisms. Tab pulls are made from anodized aluminum and have subtly rounded edges and corners to prevent damage to adjacent objects.

- Removable fabric landing pad reveals hidden pencil holder
- When in extended position, handle acts like pull to tote around the office

C9 Storage | Product Specification Details

Cart

The cart is constructed from a combination of steel frame and wood internal partitions. The steel forms a complete welded frame of 12 gauge cold rolled steel with a ¼" plate bottom panel and 40mm tube handle. These parts are joined using both continuous TIG seam welding and MIG welding. The internal partitions are constructed of ¾" NAF M2 double laminated industrial grade particleboard in black with matched 1.5mm polypropylene edge banding. The face and top panel are constructed from any of the following core materials depending on options, 18 mm European birch multi-ply plywood with a waterborne edge stain, ¾" double refined NAF MDF with a waterborne edge stain or ¾" M2 industrial NAF particle board with a 1.5mm polypropylene edge band. All of these core materials are finished with a horizontal or post-form grade high pressure laminate on the top face and a horizontal grade backer sheet for balanced construction. The laminates are cold pressed using Wilsonart 3100 PVA ultra-low VOC adhesive. Additionally, the top panel of the cart can have a fabric wrapped steel insert which provides a soft-landing sport for technology and accessories. The motion of the cart is provided by four twin-wheel 65mm swivel caster, the front two of which are locking. The unit additionally has four UHMW plastic guide pins that ensure it can be stored and removed from the garage easily. The cart comes with a double coat hook for hanging taller items on one side and includes one adjustable shelf. All metal components are powder coated.

Garage

The garage is constructed from a 12 gauge cold rolled steel welded frame with 17.5mm radius corners. The back of the garage is made from a 16-gauge piece of perforated steel, to eliminate any air pressure issues from pushing a cart into the garage and break up the large visual mass. The side panels of the garage have two options, they can either be made from ¾" M2 industrial NAF particle board in the Watson case color selections or utilized a fabric wrapped pieces of 12mm LDF with a ¼" thick NAF MDF holding this material in place. The top of the garage can be specified with a fabric wrapped steel panel to provide a soft-landing place for electronics and accessories, without the fabric panel the top panels is finished to match the face of the cart. All metal components are powder coated.

Garage Topper

The garage topper is constructed from 12 gauge cold rolled steel formed with a 17.5mm radius to match the radius on the garage. It is designed to form an L-shaped partition of additional height on the garage unit. Included in the design are slot cutouts that allot for accessory and tool mounting. The topper is held in place using machined aluminum H-clips and set screws in black and silver anodized finishes. These items can be repositioned depending on the handedness of the unit. All metal components are powder coated.

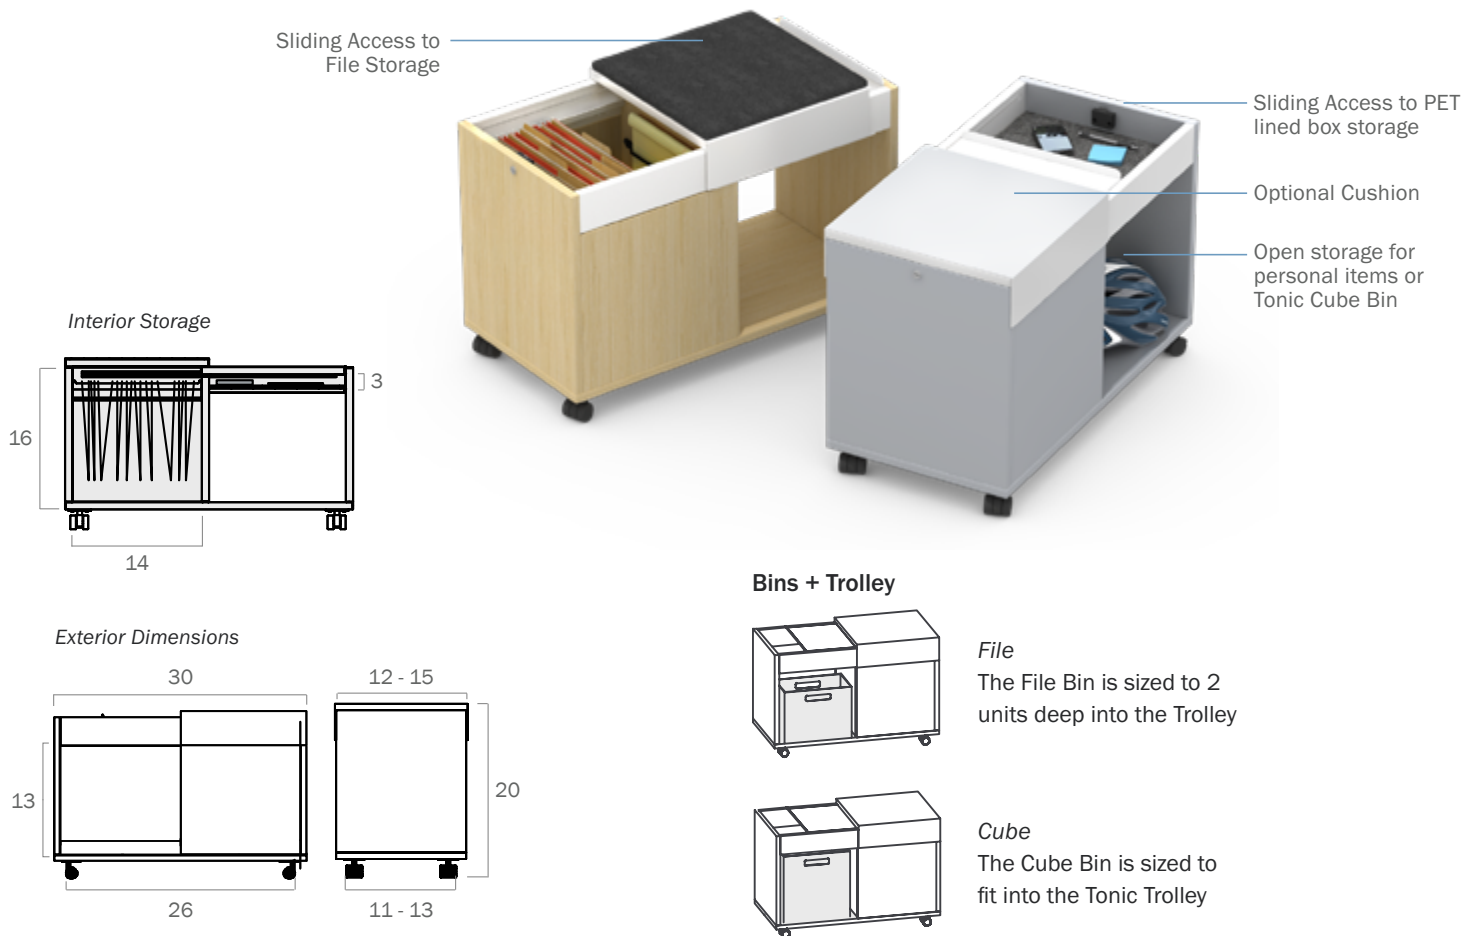

Trolley

The seamless frame is constructed from 12-gauge cold rolled steel offered in Watson powder coated finishes. The side panels – constructed from powder-coated 18-gauge perforated steel - add light to the internal storage compartment. The cushioned seat pad, tray insert, and internal pencil tray are wrapped in a matching fabric using Simalfa glue with zero VOC's. The seat pad uses a high-density closed-cell polyolefin foam to provide ample cushioning with a low profile. The lift-top tray - constructed from 12-gauge steel - rises to 28.5" above the ground to create an elevated secondary surface that can be repositioned with the lockable casters. The large, contoured handle is partially wrapped in Mocha-colored engineering leather that is easily cleanable and uses less water to produce than cow-hide leather. Removing the tray insert - constructed from 16-gauge fabric-wrapped steel and powder-coated steel - reveals a hidden storage compartment and keyed-lock. A chrome-finished bag hook located on the underside of the tray provides convenient storage for a backpack or coat. The large storage compartment underneath the lift-top tray has Charcoal powder-coated file bars and a fabric wrapped pencil tray. A second storage compartment is located underneath the seat.

Tonic Trolley

Trolley

The Watson Trolley is a great companion to Tonic Workbench, fitting underneath the surface and providing a secure place to store files or personal items, as well as providing a seat for a coworker to talk shop.

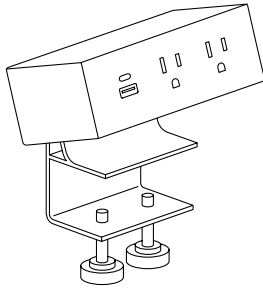

Convenience Power

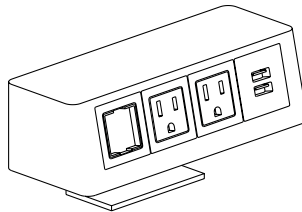

Convenience power units mount on-surface, no table cutouts or installation required.
108" plug-in cord on all convenience power units

Dean Edge Mount Power Unit

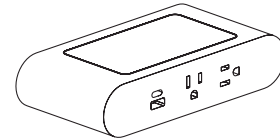

- 2 PWR, 1 Dual USB-A+C, Fog
- 2 PWR, 1 Dual USB-A+C, Storm

In-Surface Charger

Wireless charging that easily installs on any worksurface without cutting or drilling. The Qi unit (under the surface) is roughly the size of a small notepad, and the Resonator Pad (above the surface) is 4 3/4" in diameter.

72" plug-in cord on In-Surface Charger units

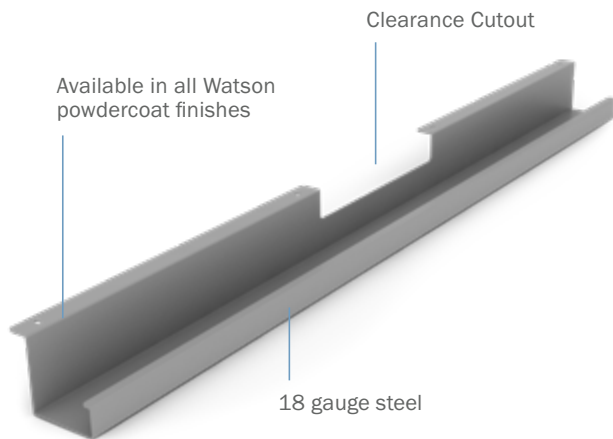

In-Surface Charger

- Foreign (Metal) Object Detection
- Able to charge through up to 2" of non-metal material
- 10W Max Output
- Samsung 10W Fast Charge
- iPhone 7.5W Fast Charge
- ETL LISTED

Cable & Tech Management

The Watson Cable Tower is a universal power & data wire management system sized to fit tables 29.5"H, 36"H and 42"H. Two positions allow the tower to sit directly over a floor core, or raised to allow routing of cables under the tower.

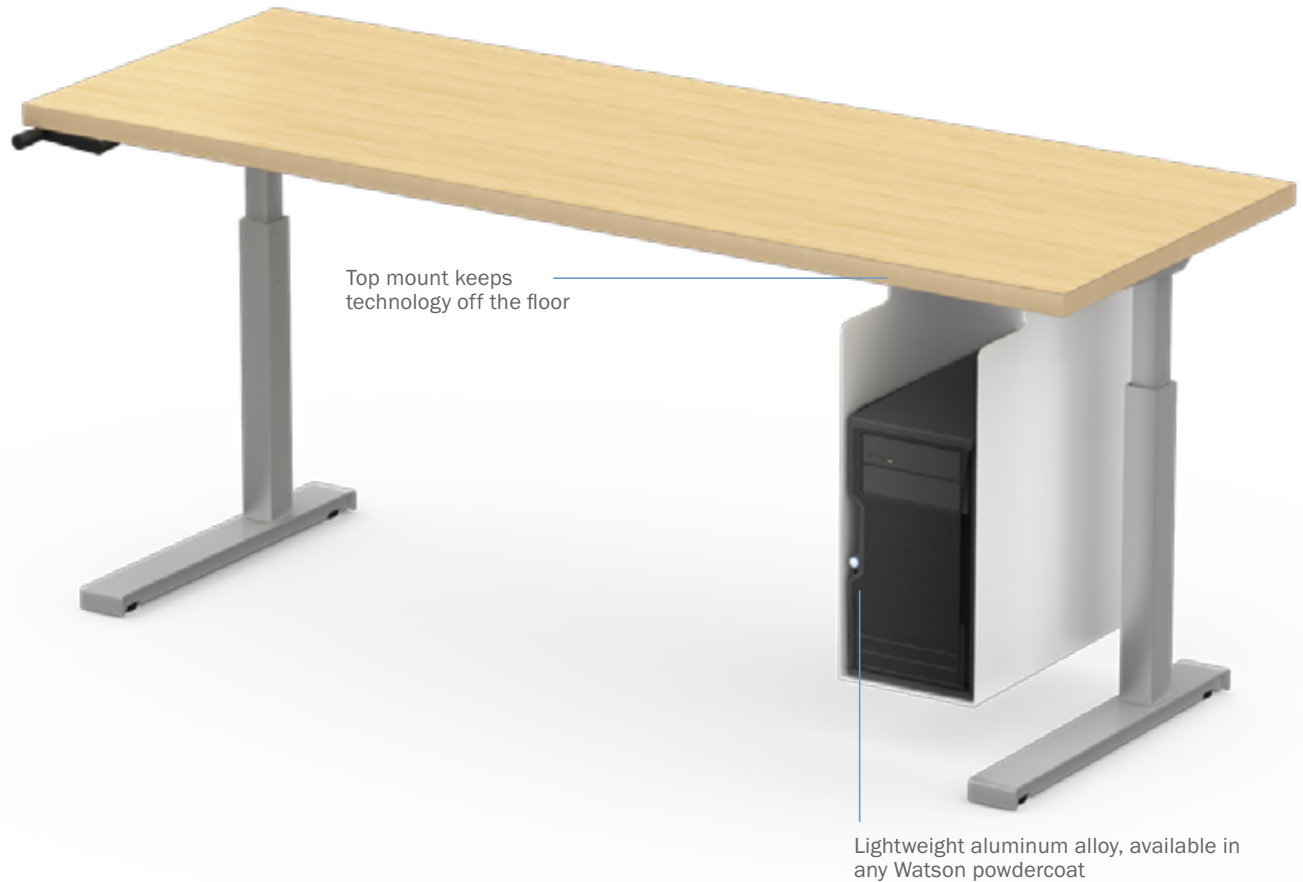

Large capacity wire manager trough attaches to underside of worksurface. Wire Manager is compatible with all base styles, modesty panels and power modules.

Alligator clips secure to the undersurface of the table using wood screws. Place them along the cable route to conceal cables.

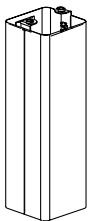

Cable & Tech Management

Universal CPU holder mounts to the undersurface of the table with wood screws. Height adjusts from 14 - 18" to accommodate most CPU's.
