Mastermind Tables

Mastermind Tables come in a range of top shapes: rectangular, boat, taper, bow tie, square, round, and arched triangle.

All Mastermind Tables have 4 legs, except for the arched triangle top shape, which has 3 legs.

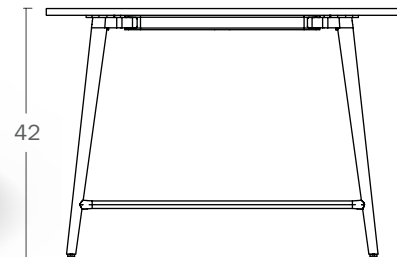

Mastermind High Tables

All top shapes are available for Mastermind High Tables except for arched triangle.

Mastermind High Tables always come with an integrated steel foot bar, which can be specified in a contrasting powdercoat from powdercoated legs.

Tables and High Tables with a width of 72" or greater and a depth of 42" or greater support an optional cable tray for added cable management when power is specified. All products in Mastermind come with under-surface mounted alligator clips.

Mastermind Leg Finishes

Legs come in three finishes exclusive to the Mastermind Collection; two solid wood legs in oak and beech, as well as a trivalent chrome leg. Mastermind legs can also be specified in powdercoated steel available in Watson's standard powdercoat finish palette.

Mastermind Tables and Mastermind High Tables In-Surface Power

The Dual-hinge power unit is Watson's unique 2-way access to in-surface power/data. Lids are grain-matched to the worksurface and provide ample space beneath for excess cables and remotes. Available in a single unit, or double unit (XL, shown below) depending on power/data needs.

Available in the following three power/data configurations:

Dual-hinge Full

3 Power
1 USB-C
1 USB-A
1 HDMI
1 CAT6

Dual-hinge Basic

Commercial 4 power plug strip
1 HDMI
1 CAT6
10' Cord

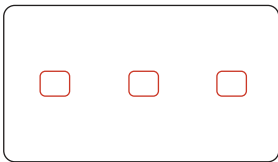

Dual-hinge Open (no power)

1 HDMI
1 CAT6

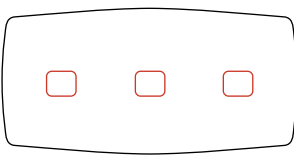

Power Locations

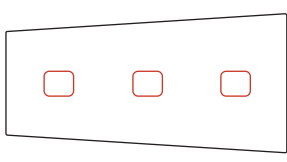

Watson's standard meeting and conference power options are also available, detailed in the pricing section on page 39.

Mastermind System

Starter / Adder / Ender

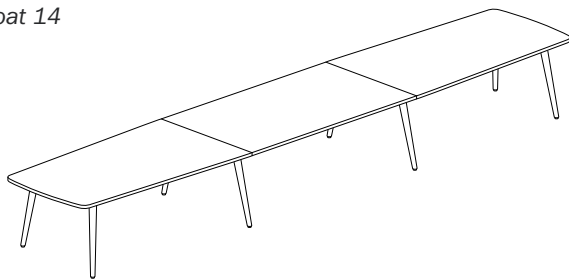

Mastermind System tables follow a starter-adder-ender logic, and can be specified in a continuous run through Watson's CET extension.

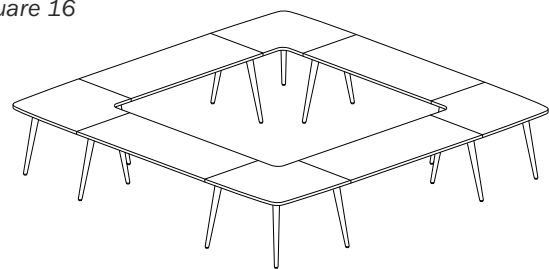

Preconfigured Offerings

Mastermind System tables offer a broad range of possible top shapes and configurations. All seated-height, System tables follow a starter-adder-ender logic and can be configured from the ground up in Watson's CET extension. Watson has configured the following eight System tables for purchasing and specifying convenience.

Mastermind System Power Cutout Locations

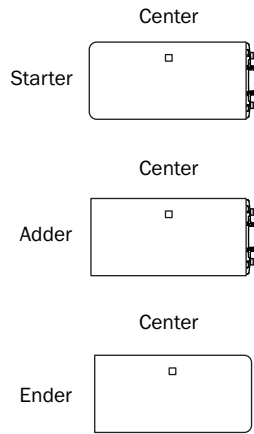

Linear Segments

The following encompasses which power cut out locations support which power options for all rectangular and boat shaped starters and enders, and all rectangular adders.

42-66"W x 30"D (Offset Power Only)

Starter, adder, and ender segments can only be specified with offset power. Any power unit can be specified except for dual hinge power.

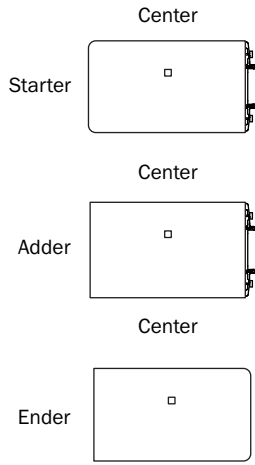

Does not support a cable tray

42-66"W x 36"D (with Offset Power)

Center Location: Starter, adder, and ender segments can be specified with any power unit except for dual hinge power.

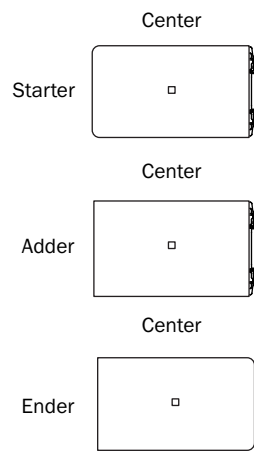

Supports an optional cable tray

42-66"W x 36"D (with Middle Power)

Center Location: Starter, adder, and ender segments can be specified with any power unit.

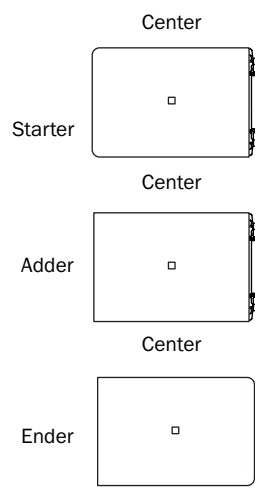

Does not support a cable tray

42-66"W x 42-60"D (Middle Power)

Center Location: Starter, adder, and ender segments can be specified with any power unit

Supports an optional cable tray

Mastermind System Power Cutout Locations

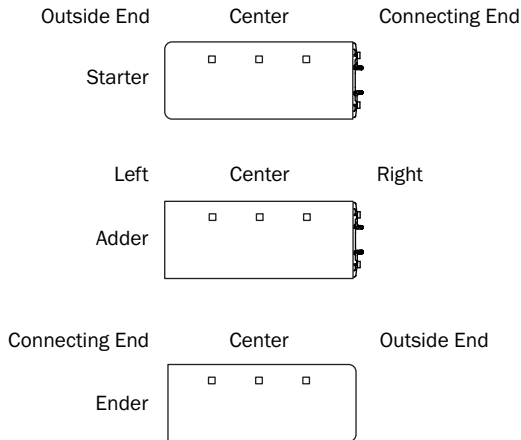

72-96"W x 30"D (Offset Power Only)

Center location: Starter, adder, and ender segments can be specified with any power unit except for dual hinge power.

Outside End and Connecting End Locations: Starter and ender segments can be specified with any power unit except for dual hinge power.

Left and Right Location: Adder segments can be specified with any power unit except for dual hinge power.

Does not support an optional cable tray

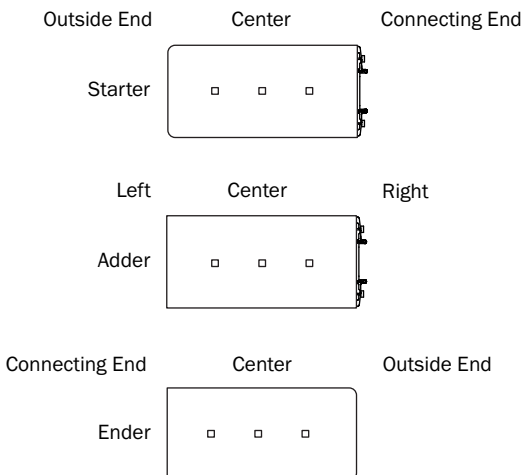

72-96"W x 36"D (with Middle Power)

Center Location: Starter, adder, and ender segments can be specified with any power unit.

Outside End and Connecting End Locations: Starter and ender segments can be specified with any power unit except for dual hinge power.

Left and Right Location: Adder segments can be specified with any power unit except for dual hinge power.

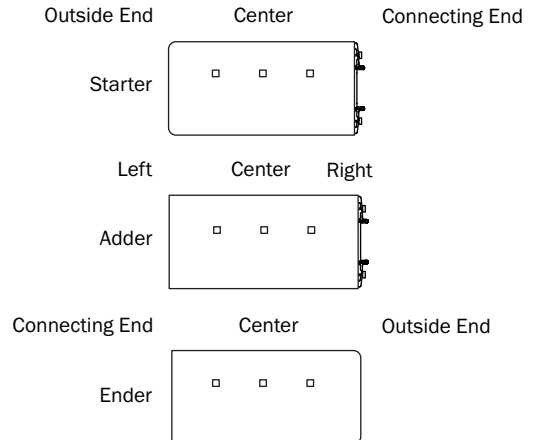

72-96"W x 36"D (with Offset Power)

Center location: Starter, adder, and ender segments can be specified with any power unit except for dual hinge power.

Outside End and Connecting End Locations: Starter and ender segments can be specified with any power unit except for dual hinge power.

Left and Right Location: Adder segments can be specified with any power unit except for dual hinge power.

Does not support an optional cable tray

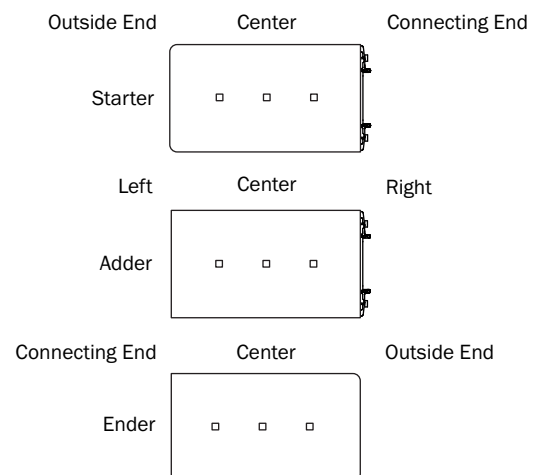

72-96"W x 42-60"D (with Middle Power)

Center Location: Starter, adder, and ender segments can be specified with any power unit.

Outside End and Connecting End Locations: Starter, adder, and ender segments can be specified with any power unit except for dual hinge power.

Left and Right Location: Adder segments can be specified with any power unit except for dual hinge power.

Supports an optional cable tray

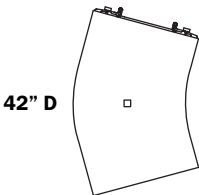

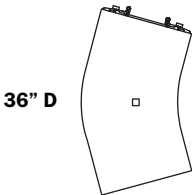

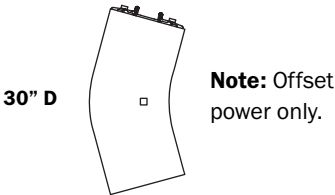

Mastermind System Power Cutout Locations

30 Degree Adder Segments

All 30 degree adder segments have power centered in the segment, and can be specified with any power unit except for dual hinge.

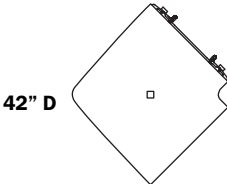

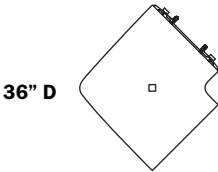

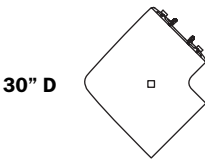

Only segments with a 42"D can be specified with an optional cable tray.

90 Degree Adder Segments (Middle Power Only)

All 90 degree adder segments have power centered in the segment, and can be specified with any power unit except for dual hinge.

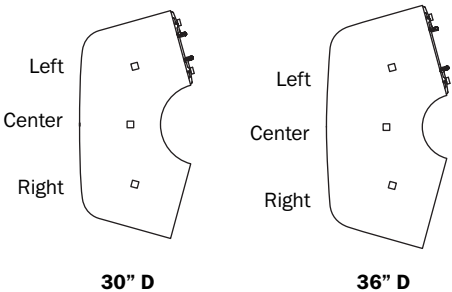

Only segments with a 42"D can be specified with an optional cable tray.

150 Degree Adder Segments (with Offset Power)

Center Location: can be specified with any power unit except for dual hinge.

Left and Right Locations: can be specified with any power unit except for dual hinge.

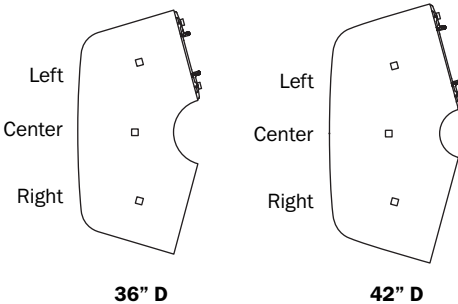

150 Degree Adder Segments (with Middle Power)

Center Location: can be specified with any power unit except for dual hinge.

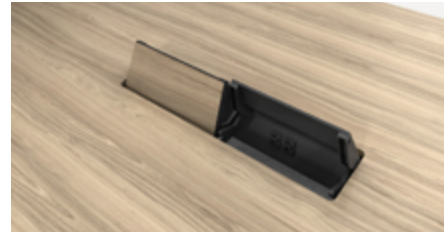

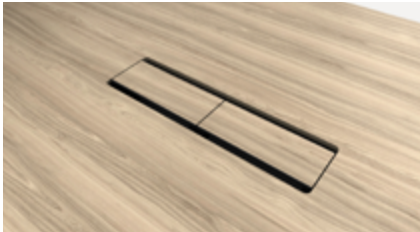

Left and Right Locations: can be specified with any power unit except for dual hinge.

Only segments with a 42"D can be specified with an optional cable tray.

Mastermind System In-Surface Power

The Dual-hinge power unit is Watson's unique 2-way access to in-surface power/data. Lids are grain-matched to the worksurface and provide ample space beneath for excess cables and remotes. Available in a single unit, or double unit (XL, shown below) depending on power/data needs.

Available in the following three power/data configurations:

Power Locations

Watson's standard meeting and conference power options are also available, detailed in the pricing section on page 39.

Mastermind | Product Specification Details

Mastermind Frame

The frame consists of aluminum support beams and top cast elements. The top cast elements are the connecting pieces between the support beams, table legs, and worksurfaces.

Mastermind Support Beam

The support beam is a 6063-T6 aluminum I-Beam extrusion and is finished in anodized aluminum. The end of the support beam are comprised of two cast elements, secured to internal channels in the extrusion.

Mastermind Legs

Mastermind legs are available in 4 distinct materials and finishes. Steel legs are available in any of Watson's standard powdercoat finishes. Chrome legs are available with a multi-layer trivalent chrome finish. Wooden legs are available turned from solid natural beech and white oak with a hard wax oil finish. Seated height legs are 29.5" high and standing-height legs are 42" high. Standing-height legs always come with a foot bar. The tubular legs are supplied fully assembled with top cast elements. The glide at the end of the legs provides an adjustment range of 3/4" and are adjustable without the use of tools.

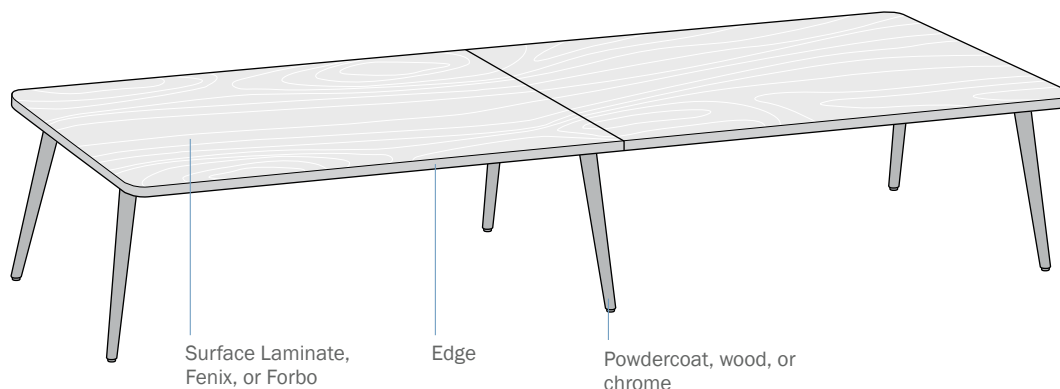

Mastermind High Tables Foot Bar

The foot bar on all High Tables is constructed of 1-1/4" diameter steel tube which is powdercoated in any of Watson's standard powdercoat finishes. The foot bar is connected to table legs via silver anodized cast aluminum joints which will be powder matched to the foot bar.

Mastermind Surface

Surfaces are available in a NAF MDF, NAF particleboard, or European birch plywood core material. Embedded cast connectors in the surface allow for easy 1/4 turn fastening to the leg top casting. The worksurface comes standard with undersurface-mounted wire management clips.
