

Tonic

FOR EVOLVING SPACES

watson

Classic Design for Tomorrow's Spaces

The Tonic Collection provides a versatile foundation for evolving workspaces and invites individuals and teams to engage with their environment on their terms. Tonic's designs will remain functionally and visually relevant for years to come.

Tonic Work Table

Tonic Work Bench

Tonic Table

Tonic Conference Table

A Fresh Perspective

Distilled shapes, like the graphic impact of Tonic's end yoke, add to the collection's timeless appearance.

Intuitive Settings

Tonic Workbench is an adaptive benching system that flows with the pace and needs of modern working environments through functional, modular accessories.

Guided by Possibility

The core of the **Tonic Workbench** is its array of modular, infill components which make up its center deck. These enable individuals, teams, and designers to create purposeful, reconfigurable settings.

Designed for Versatility

The **Tonic Workbench** emphasizes choice and flexibility, allowing it to suit a range of needs and applications. Select between seated or standing-height options, single or dual-sided configurations, and customize it with a range of infill components and accessories.

One System, Endless Possibilities

The **Tonic Workbench** caters to individual and communal spaces, accommodating different work modes seamlessly. With a variety of modular infill components, it effortlessly transitions between focused work and team collaboration. Standout features include easy access to power, privacy screens, planter boxes, and Watson's Neighborhood Light which includes USB-A and USB-C charging ports.

Where Work & Play Meet

The plug-and-play nature of the **Tonic Work Table** is perfect for untethered workers. Work Tables are ideal for quiet areas, lounges, creative labs, corporate environments, and more. Its easy access to power, inviting accessories, and versatility make it a valuable choice for any space.

The Power of Flexibility

The Work Table utilizes single-circuit power, meaning it doesn't need to be hardwired. This makes it easy to install and easy to move in the future.

A Better Conference Landscape

Tonic Conference Tables carry the collection's visual language with their angled legs and intentionally functional design. Create a tailored configuration by selecting from their range of height options and sizes, then add Watson's standard meeting and conference power options where you need it for added convenience.

Simplicity Meets Craft

Tonic Tables embody meticulous design sensibility and exceptional functionality. Whether you're outfitting a café, meeting room, common area, or a relaxed work lounge, these tables prove to be a dependable and aesthetically pleasing addition to any space.

Make Your Mark

Additionally, they can be specified with drop-in power, can accommodate a monitor mount accessory, and make use of Watson's array of premium finishes and edge profiles. Or select the rotating round for an interactive, interior markerboard surface.

Stow & Go

Tonic Storage is a fresh take on conventional personal storage. The compact outer dimensions, durability, and top-tier finish options make these pieces ideal for high density environments.

Tonic Stash

With its slim footprint, Stash is the ideal companion for dense, open plan environments or those with light individual storage needs.

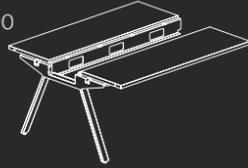

Tonic Trolley

The Tonic Trolley is cleverly designed with multiple compartments, a sliding top, and an open cell for convenient storage. Its sleek look is enhanced by powder coated metal accents, perfect for branding or adding pops of color.
